

**Ahermatypic hexacorals
(Scleractinia) & Bryozoa of the
Pinecrest Beds of Sarasota, Florida:
Late Pliocene Tamiami Fm.**

John E B Baker

Corals (Anthozoa) of the
Pinecrest beds #6-#7 of
the Late Pliocene
Tamiami Fm., Sarasota,
FL

hexacorals

Septastrea marylandicus

Encrusting small, dead
gastropod occupied by a
hermit crab

Septastrea crassa ?

Oculina sarasotaensis

5-6 sided
corallites w/
round calyx &
columella –
12 septa at
surface, 24
total

Oculina sarasotaensis

Oculina sarasotaensis

Astrangia sp.

Tiny initial
polyp from a
newly settled
planula

1 mm

***Astrangia* sp.**

• Tiny initial
polyp from a
newly settled
planula: **1.5mm**

Bryozoa of the
Pinecrest beds
#6-#7 of the Late
Pliocene
Tamiami Fm.,
Sarasota, FL

**Encrusting Multilaminar
Bryozoa**

Schizoporella floridana

*Schizoporella
floridana*

zoid height
~500um

Areolae around frontal wall

Schizoporella floridana

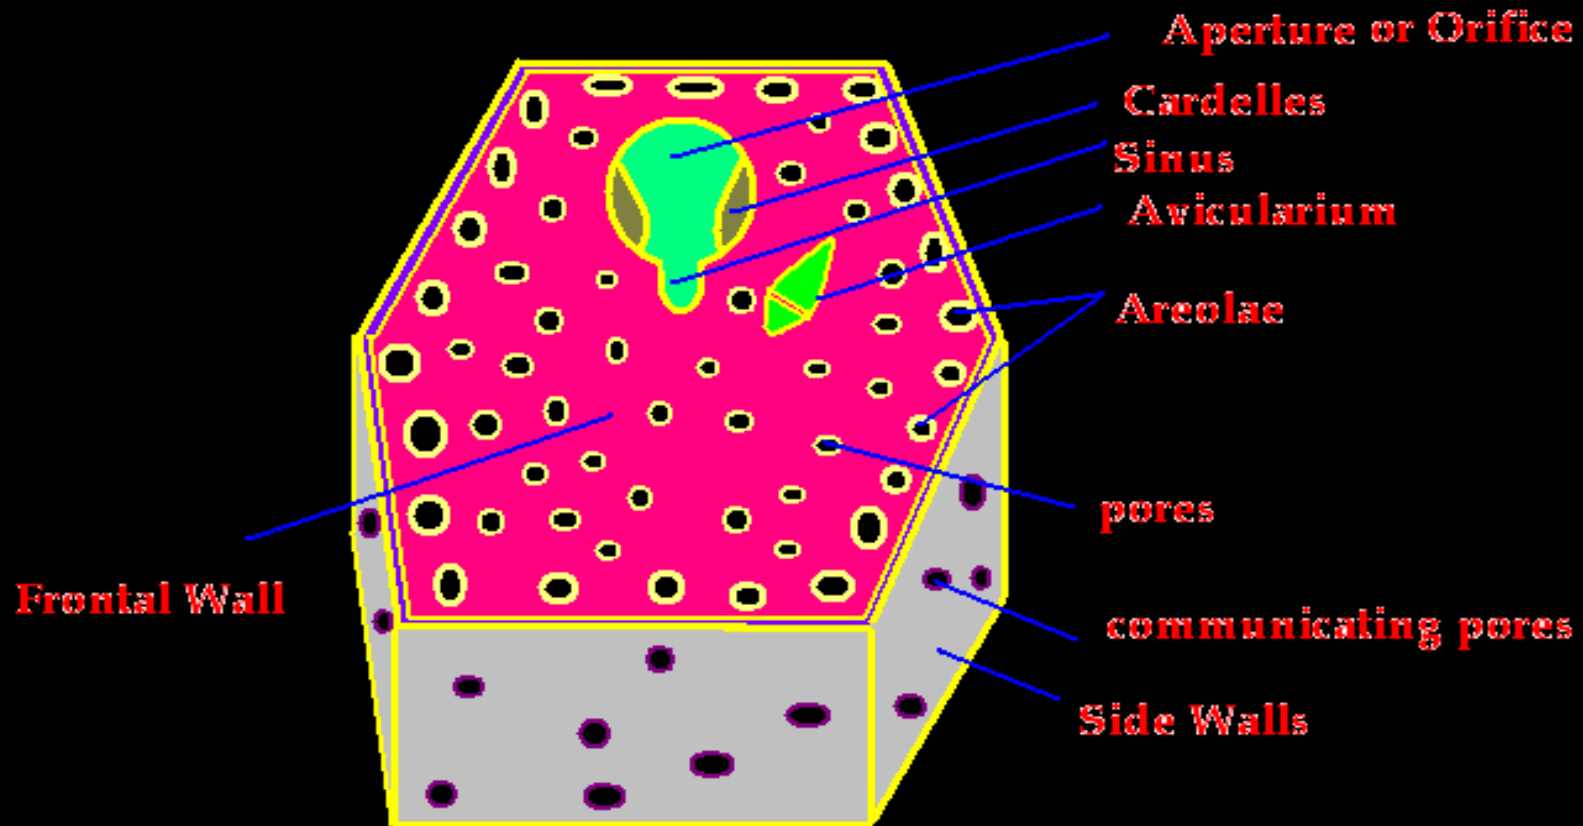

orifice

Advent. avic.

A Cheilostome Bryozoa polyp
 Eucoelomate-Deuterostome

Gymnolaemata: Cheilostomata: Ascophora

to ancestrula=proximal

Bryozoan Life Cycle

Hippopthoa sp.: an Ascophoran

Hippopthoa sp.

? *Cellepora* sp.

ovicells

Avicularia

Raised, inturned umbo above
each zooecium

Cellepora sp.

2 mm

setae

Discoporella sp.

Conopeum sp.
